Summary

AI/ML and full-stack developer currently working as a Full Stack AI Developer, with hands-on experience across 3 prior industry internships delivering production-ready deep learning pipelines, NLP systems, and React applications. Proficient in TensorFlow, Python, and modern web technologies, with a track record of building and shipping scalable, intelligent systems end-to-end.

Education

FAST National University of Computer and Emerging Sciences — Lahore, Pakistan
Bachelor of Science in Computer Science — *Sep 2022 – Jun 2026*

Work Experience

Full Stack AI Developer — Jun 2026 – Present
Seamry Solutions — *Lahore, Pakistan*

- Develop and integrate AI/ML-powered features into full-stack web applications, working across model integration, backend services, and UI delivery
- Build and maintain production-grade systems spanning frontend, backend, and machine learning components within an end-to-end development workflow

Computer Vision & Deep Learning Intern — Jun 2025 – Aug 2025
ML-Bench — *Lahore, Pakistan*

- Engineered deep learning pipelines for image analysis using CNNs, OpenCV, and TensorFlow on 10,000+ image datasets
- Improved model accuracy by 15% and reduced inference latency by 20% through hyperparameter tuning and architecture optimization
- Collaborated with 5+ engineers to integrate and deploy ML models into production systems

AI Intern — Jul 2024 – Sep 2024
Datics AI — *Lahore, Pakistan*

- Designed ML models for NLP applications using Python, Pandas, and Scikit-learn, achieving 85%+ classification accuracy
- Built chatbot prototypes handling 500+ daily queries with automated response generation, reducing manual support load

Web Developer Intern — Jun 2024 – Jul 2024
Code Alpha — *Lahore, Pakistan*

- Delivered 3 responsive web interfaces in React, HTML5, and CSS3 serving 200+ users, cutting page load time by 30%
- Implemented accessible, WCAG-compliant UI/UX designs following Agile sprint workflows

Projects

Guardian Sense | *Next.js, Node.js, Flutter, MongoDB, TensorFlow* — 2024

- Architected an AI-driven emergency response system using smartphone sensors; TensorFlow classifier achieved 92% detection accuracy
- Built cross-platform Flutter app and RESTful Node.js backend supporting 50+ concurrent users

Check INN, Chill Out | *MERN Stack, JWT* — 2024

- Developed full-stack hotel management system with booking engine, role-based access control, and JWT-secured API endpoints

Disease Prediction System | *Python, Scikit-learn, Pandas* — 2023

- Trained 4 ML classifiers (Random Forest, SVM, KNN, Logistic Regression); achieved 88% accuracy on 5,000+ patient records using SMOTE

Spare Parts Management System | *PHP, MySQL, Bootstrap* — 2023

- Built inventory system with real-time stock tracking; optimised indexed MySQL queries, reducing report generation time by 40%

Technical Skills

Languages: Python, JavaScript, C++, C, SQL, PHP
ML/AI: TensorFlow, Keras, OpenCV, Scikit-learn, Pandas, NumPy
Web: React, Next.js, Node.js, Express.js, Flask, REST APIs, HTML5, CSS3
Databases & Tools: MongoDB, MySQL, Git, GitHub, Docker (familiar), Linux
Other: Tailwind CSS, Bootstrap, Agile, Scrum, OOP, SOLID Principles, MVC

Certifications

Deep Learning Specialization (5 courses) – Coursera / DeepLearning.AI *(Neural Networks, CNNs, Sequence Models, Hyperparameter Tuning, Structuring ML Projects)*
